## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, C++, C#, Java, HTML/CSS, SQL
**Technologies:** React, Node.js, MySQL, MongoDB, Git, Jest, .NET

## EDUCATION

**Georgia Institute of Technology** Atlanta, GA
*Master of Science in Computer Science, GPA: 3.62* Aug 2025 – Dec 2026

**Bowie State University** Bowie, MD
*Bachelor of Science in Computer Science,* GPA: 3.93 Aug 2021 - Dec 2024

## WORK EXPERIENCE

**Goldman Sachs** Dallas, TX
*Summer Engineering Analyst* May 2026 – Aug 2026

- Developed and deployed front-end features for an internal liquidity application using React and JavaScript, translating product requirements into production-ready interfaces.
- Built maker-checker audit report tables with advanced search, filtering, and sorting capabilities and integrated React components with existing REST APIs and databases.
- Collaborated with product managers and backend engineers across implementation, testing, code review, debugging, and deployment to deliver end-to-end functionality.

**Johns Hopkins University Applied Physics Laboratory** Laurel, MD
*Software Engineer Intern* May 2025 – Aug 2025

- Designed an intuitive MATLAB GUI for senior engineers, reducing user errors and accelerating test execution.
- Researched and implemented a C#/.NET and Python data pipeline**,** focusing on multithreading, runtime performance and memory usage. Utilized Benchmark**.**NET to evaluate and compare implementation approaches.

**Apple** Austin, TX
*Hardware Technology Intern* May 2023 – Aug 2024

- Collaborated with full-time hardware staff to develop three testing scripts in Python that automated data analysis, reducing post-processing time by over 90% and improving data visualization. Integrated the results into a Graphical User Interface, optimizing the testing process for a significantly faster user experience and quicker deployment.
- Developed a tool to automatically check code for compile errors and formatting issues before committing to Perforce, improving workflow efficiency.

**Bowie State University** Bowie, MD
*Research Assistant* Aug 2022 – May 2023

- Achieved identification of key terms to detect dementia-related discussions by applying NLP techniques, including TF-IDF, to analyze language patterns on dementia community forums and identify the top 100 terms.
- Delivered research presentation at the University Research and Innovation Expo, securing first place.

**Northrop Grumman** Baltimore, MD
*Cyber Software Engineer Intern* May 2022 – Aug 2022

- Developed a Python-based testing framework prototype using YAML-configured dynamic imports while collaborating with interns and full-time engineers in an Agile environment.

## PROJECTS

**NASA MITTIC Competition Winner** | Python Aug 2024 – Dec 2024

- Led a team of six individuals to develop a product concept using NASA's automated vision test and computational visual servo IP to improve accessibility on personal devices for visually impaired individuals. Top 10 finalist, awarded $20,000.

**Ikhaya Lethu Care Website Redesign |** Develop for Good - Product Manager May 2026 – Aug 2026

- Led the redesign and development of a nonprofit WordPress website, coordinating engineers and designers, assigning development tasks, managing client requirements, and contributing to website implementation.

## ORGANIZATIONS AND CLUBS

Girls Who Code Alumni Advisory Council Feb 2026 – Feb 2027
Graduate Student Association Social Media Chair Apr 2026 – Dec 2026
Women in Computer Science Club President Aug 2021 – Dec 2024
