Revolutionizing Vision, One Screen At A Time

A Growing Digital Epidemic

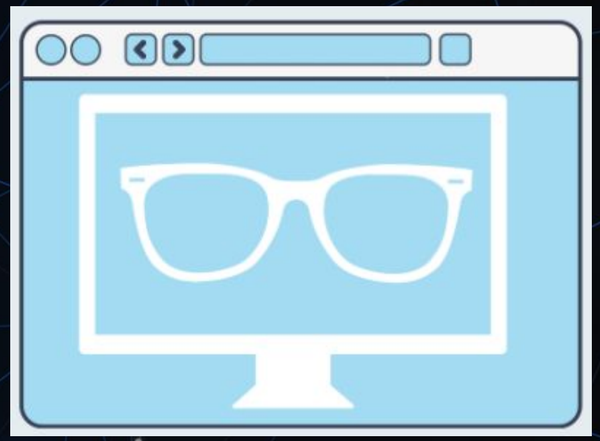

Challenges For Glasses Wearers

The Cost Of Eye Strain

Introducing Screen Sight

Our Focus Is

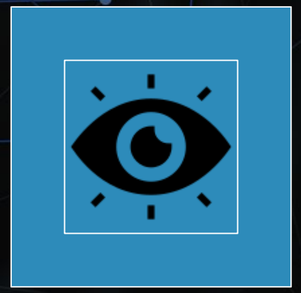

On Your Vision

ScreenSight is a software application that uses **NASA technology** to adjust screen settings in real time, matching users' prescriptions for clear, comfortable viewing—without glasses.

MARKET SIZE

Total Addressable Market:
This includes all global digital device users who experience digital eye strain, representing the full potential market if everyone adopted Screen Sight.

Service Addressable Market:
This focuses on users in key regions like the U.S., Europe, and Asia, where high digital device usage and access to technology align with Screen Sight's target audience.

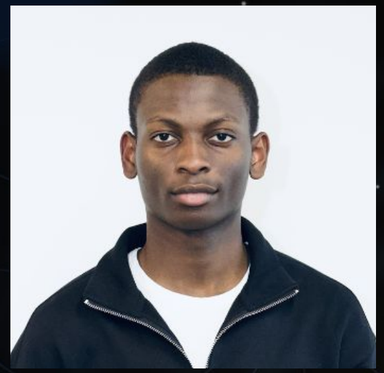

Service Obtainable Market:
This portion represents an estimated 10% of North Americans who wear glasses adopting Screen Sight, reflecting our realistic market capture in approximately 1–3 years.

Initial Batch Estimates	204 Units of Sleeves
Sleeve Profit Margin	11%
Sleeve Cost per Unit	$13.39

LETTER OF SUPPORT

“ Screen Sight stands out as a transformative solution for glasses wearers, seamlessly merging smart vision correction with privacy-enhancing technology. This is especially intriguing within the context of esports and gaming, where maintaining optimal vision and comfort during extended screen time is essential. As someone who is deeply involved in student technology, I see Screen Sight as a perfect fit for the growing demands of gamers and students alike, particularly in environments where eye strain and screen fatigue are daily challenges. “

Maurice A. Tyler
